To Whom It May Concern,

After hearing about Vital Safety Services and their insistence in providing top quality services, I decided to give them a try them in our 1,300+ suite condominium. Our previous provider had let us down on several occasions, with troubles lasting for months. Mark and his staff were able to resolve issues that had been ongoing in a matter of days, and has shown us that he can provide the level of service I would expect from any top level company out there.

Whether it be the quickness in providing quotes, the speedy response to service calls and the general overall understanding of their customers' needs, it is with great pleasure that I highly recommend Vital Safety Services for any of your requirements. I know when we are in need of any of their services, it will be conducted in the highest level of workmanship, in a timely manner with extremely fair pricing.

I believe Vital Safety Services have all of their customers best interest in mind at all times.

Yours very truly,

---
