Mark Fera
Vital Safety

I am writing in recommendation for Vital Safety Services. They have met all of our fire protection needs from annual inspections, emergency repairs, sprinkler, monitoring etc. Vital is large enough to handle all our fire protection needs with extreme; but also small enough to know you personally when you call for assistance. The "personal touch" we receive from all Vital staff is very important to us, as they make sure that all of our needs are met in a professional, cost effective and very timely manner.

You can expect honesty, open communication and have complete confidence that all aspects of the work performed will be with the utmost quality and professionalism. I consider them a partner in which to be relied upon through all aspects of my projects. We have always been pleased with the professional manner in which all services/repairs have been completed. Projects have ranged from small to large and no matter what the size, we have been pleased with the price and workmanship. We look forward to many more years of this partnership.

In closing, let me say I have no hesitation in recommending Vital Safety Services to other companies, and look forward to working with you in the future.

Sincerely,
LARLYN PROPERTY MANAGEMENT LTD.
